

Abstract of the Disclosure

[00159] An electronic system and method of pervasive output allow an information apparatus to output data content conveniently to virtually any output device. One method includes establishing a communication channel between the information apparatus and an output device and receiving at the information apparatus over the communication channel an attributes corresponding to the output device. The output device may then be selected at the information apparatus based at least in part on the attributes. The data content is delivered to the output device for rendering.
